

Evergreen Innovations LLC

Growing Change

PROBLEM

The future battlefield is integrated with the latest technologies. Unfortunately, the standard defense contracting infrastructure is stuck on antiquated systems with bloated budgets.

With multi-year procurement cycles and imbedded companies, the US government isn't moving fast enough to develop the knowledge on how to effectively combat near-peer adversaries.

SOLUTIONS

1 Technology Evaluation

We will provide in-depth analysis of specific or general technologies and/or methodologies based upon your specific mission set and required effects.

2 Scenario Development

TTP development can really only happen in a training environment. We will create scenarios to integrate new technologies in order to determine their best implementations.

3 Integration Engineering

We also help with the physical integration of new technologies along with your existing ones to provide seamless capabilities expansion.

Evergreen Innovations LLC

GROWING CHANGE | 2022

CUSTOMER BASE

We have a diverse range of customers who have on-going contractual relationships with our organization. We strive to bring them the best solutions possible in a timely and combat effective manner.

Air Force Research Lab (AFRL)

National Guard Bureau (NGB)

Defense Companies
